

# SHELTER KENNEL PROTOCOL

## Before Starting the Cleaning Process:

- ✓ Remove animals from the task area..
- ✓ Remove food and water dishes, bedding and toys from the area before implementing the cleaning process.
- ✓ Wash and/or sanitize hands.
- ✓ Put on protective gloves, and other PPE if needed.

## Daily Cleaning Protocol:

1. Remove all solid waste.
2. Rinse floor towards drain to remove urine and heavy soil.
3. Flush drain.
4. Pour full strength **Animal Facility Disinfectant** into **foam gun** reservoir tank. Select and insert dilution tip (see foam gun use instructions)
5. Connect spray gun to water source and reservoir tank to spray gun.
6. Start at the top of the cage or run and work down and out covering the entire surface.
7. Agitate surface to remove heavy soil buildup.
8. Allow the solution to stand for a minimum of 10 minutes to ensure complete effectiveness.
9. Rinse or squeegee solution towards the drain.
10. Remove puddles before reintroducing animals to the area.
11. Rinse any dishes, toys, etc. that may have come in contact with the cleaning solution.

## 1 or 2 Times Per Week:

1. Follow steps 1 through 3 above.
2. Using a dedicated **foam gun**, pour full strength **Kennel Care Enzymatic Floor Cleaner** into foam gun reservoir tank. Select and insert dilution tip (see foam gun use instructions)
3. Start at the top of the cage or run and work down and out covering the entire surface.
4. Agitate surface to remove soil buildup.
5. Allow the solution to stand for 3 to 5 minutes.
6. Rinse or **squeegee** solution towards the drain. ***This will help control odors and improve drain flow.***
7. Remove puddles before reintroducing animals to the area.
8. Rinse any dishes, toys, etc. that may have come in contact with cleaning solution.

## Leaving the Task Area:

- ✓ Place Wet Floor Safety Signs to avoid dangerous slip and falls.
- ✓ Remove and discard gloves and other PPE.
- ✓ Wash and/or sanitize hands.
