To Whom It May Concern,

The Catty Shack Ranch Wildlife Sanctuary wanted to add its voice to the others giving testimony to the line of ProVet Logic products.

The Catty Shack Ranch Wildlife Sanctuary started using ProVetLogic products just over a year ago to clean our animals' enclosures. All our enclosures are exposed to the weather, so mold and algae are always a concern. Applying ProVetLogic by spray and scrubbing the surfaces leaves them clean and smelling fresh. It amazed everyone using it how much better it worked than our previous cleaning regimen.

We decided after using ProVetLogic for a while to develop a program centered around using these products to thoroughly clean every enclosure. Our "Deep Clean" program ensures every surface in every enclosure is cleaned on a rotating basis. Extra care is given to an area if an animal is ill for any reason and before moving animals into a new habitat.

When we were first considering ProVetLogic products, Larry and Colleen Shively came to our sanctuary in Jacksonville, Florida, to explain the line of products and how to make best use of them. We appreciated the personal attention they gave us. Additionally, ProVetLogic, LLC, has donated equipment to us that help us continue to do our work. Larry, Colleen, and the rest of the ProVetLogic team have been amazing people to work with.

Sincerely,

A handwritten signature in blue ink that reads "Kurt Lessenthien".
