ProVet Logic Testimonial

In early 2012 Birmingham Zoo made the switch to ProVetLogic products. Before this, each area had been using a variety of cleaners and disinfectants with little understanding of how they worked. Larry was able to come in and educate us all on the “science” of cleaning and why it is important to use things as directed.

Since, switching to the ProVetLogic products, keepers have reported on the ease of using the foamers and how well the product removes dirt from different surfaces. With this new system in place we have been able to streamline the cleaning and disinfecting process. It also smells good!
